***Allowable Subject Matter***

1. Claims 1-28 are allowed.
2. The following is an examiner's statement of reasons for allowance:

As per Claims 1 and 8.

The present invention is directed to a method for controlling a dynamic scale for processing mixed postal items. Each independent claim identifies the uniquely distinct features "deactivating regulation of the conveying speed during a measuring time range while said postal item is conveyed without a stoppage through said weighing pan, so that said conveying speed is dependent on said weight of said item and with no controlled reduction of said conveying speed". The closest prior art, Greanias (3977483A), Tolson(5684275A), Molitor et al.(DE3504511A1), Tsukasa et al.(EP000458974A1), Herrle, Harald L., Dynamic Weighing: A Look at What In-Motion Weighing is All About(Reports on Checkweighing), Hills et al.(3977533A) and Check et al.(4239088A) disclose the article stopping completely, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious. In this invention the slow down occurs via inertia whereby the article weight is the

driving force and friction offers resistance to effectively slow down the article so that the article does not stop. The article is effectively coasting along via inertia.

The claims which depend from the above allowed claims are allowed based on their dependencies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Debra F. Charles whose telephone number is (703) 305-4718. The examiner can normally be reached on 9-5 Monday thru Friday.
